1. Court Discovery Screen (Tìm sân)

This is where the user starts their journey.

The screen allows users to **search for badminton courts nearby** using a map-based interface. They can either type a location or use the GPS button for quick access to nearby courts. District filters like *Quận 1, Bình Thạnh, Quận 7* help narrow down results quickly.

Each court is displayed as a **card with key information** such as rating, distance, and price per hour. Users can immediately take action by pressing **"Đặt sân ngay"** without navigating through multiple screens.

👉 The goal here is speed and convenience:
Users can go from *opening the app → finding a court → booking* in just a few taps.

2. Time Slot Selection (Chọn giờ chơi)

After selecting a court, the user moves to scheduling.

This screen allows users to **choose a date and available time slots**. The system clearly separates:

- Morning / Evening slots
- Peak hours (highlighted visually)
- Unavailable slots (locked)

When a user selects a time slot, the **total price updates instantly**, along with the assigned court number.

👉 This helps users:

- Understand pricing transparently
- Avoid conflicts with unavailable times
- Make quick booking decisions

The flow ends with the **“Đặt lịch”** button to confirm the reservation.

3. Player Matching / Community (Danh sách người chơi)

This screen focuses on **finding and connecting with other players**.

Users can filter players based on skill levels like:

- Beginner
- Intermediate
- Professional

Each player card shows:

- Skill level
- Match history or win rate
- Quick access to profile or messaging

👉 This enables:

- Easy matchmaking
- Balanced games based on skill
- Social interaction within the platform

Users can review players and proceed to **join or form a match group**, then continue to payment.

4. Player Profile & Stats (Hồ sơ người chơi)

This screen provides a **detailed performance overview** of a player.

It includes:

- Level progression and ranking
- Win rate and recent performance trend
- Match history with results and XP gained

👉 This serves two purposes:

1. **Self-tracking**: players monitor their improvement
2. **Trust & matchmaking**: others can evaluate skill level before joining

The gamification elements like XP, streaks, and rank help **increase engagement and motivation**.

5. Group Wallet & Cost Splitting (Ví nhóm)

This is one of the core unique features of your app.

After a match, users can manage shared expenses through a **group wallet system**. The screen shows:

- Current balance of the group fund
- Individual contributions (who paid more/less)
- Expense history (court fees, drinks, shuttlecocks, etc.)

The system also supports:

- **Automatic cost splitting**
- **QR code payment for quick transfers**
- Notifications for additional contributions

👉 This eliminates:

- Manual calculations
- Awkward money discussions
- Payment delays

It makes the whole experience **seamless and fair for all players**.
